(607) 342-1509

TECHNICAL SUMMARY

Web developer proficient in designing and developing modern web based applications and websites. Experienced programmer with full stack development skills and a focus on material design. Proficiency in various programming languages and a strong willingness to learn. Currently seeking internship or employment in the field of web or software development.

ACADEMIC

Alfred State, the SUNY College of Technology
Bachelors of Technology - IT: Web Development
3.70 GPA - Dean's List 7 Consecutive Semesters

2014 - Present
Expected Graduation: May 2018

PROJECTS

PHP CodeIgniter App - A PHP web app built using CodeIgniter. This app allows users to create and review vacation destinations. User and vacation data is stored using a MySQL database.

Events Manager - An event management app built using Vue on the front end and Vuetify for material design components. Uses Firebase on the backend to store events and images, and for user authentication.

Portfolio - Designed and created my own portfolio website to showcase my projects and skills as a developer. Running on an Ubuntu server and using Node.js and Nginx. Configured with SSL using a Let's Encrypt certificate. ([Link](#))
