TECHNICAL SUMMARY

I raise the visual quality of products and bring the user value through delight in the product. I champion principles of simplicity, consistency, subtlety, and visual beauty. I look for opportunities to engage users with subtle design flourishes and animations. I work in both users first impressions of a product and in supporting long term use.

PROJECTS

Cubed CSS - Cubed CSS is a framework I am writing in Sass for easily creating lightweight, responsive, and accessible web interfaces. It's currently a work in progress, but currently has a fluid grid system based on flexbox, custom SVG form elements, and a few other components.

CBORD Patient - This is an app I've been designing and developing recently for CBORD. It's written in Angular using the Ionic framework and allows patients in a hospital to order food without exceeding their dietary restrictions. I've been largely contributing towards conducting usability tests, design, and front end development.

Portfolio - Designed and created my own portfolio website to showcase my recent projects and skills as a designer. Used entirely my own CSS from the Cubed CSS framework I am developing. Configured with SSL using a Let's Encrypt certificate. ([Link to Portfolio](#))

SKILLS

CSS	Git	Sass
Sketch	Ionic	Material Design
Angular	Design Systems	Prototyping
UX/UI Principles	Wireframes & Mockups	Illustration

EXPERIENCE

Product Designer CBORD 950 Danby Rd Ste 100c, Ithaca, NY 14850	Feb 2018 - Present
---	--------------------

ACADEMIC

Alfred State, the SUNY College of Technology Bachelor of Technology - IT: Web Development 3.70 GPA	2014 - 2018
